

Dear Members of FCC,

The thought of one company controlling a town/region's news is a chilling one. The possibility exists where an agreement with the media company and a business can occur to "review" or leave out certain damaging information about that business that the public should know. The possibility of that agreement exists now but to a lesser degree. I ask you to vote against cross-ownership of media because it can severely limit the information given to the American public. The FCC was created to protect Americans and you have the chance to help keep America free and informed.
